VI ANNUAL SCIENTIFIC CONFERENCE WITH INTERNATIONAL PARTICIPATION

**“ Actual Issues on Safety
and Analysis of Human
Health Risk from
Environmental Hazards ”**

Russia, Perm, 13-15 May 2015

Dear colleagues and friends,

It is a great pleasure to invite You to the VI Annual Scientific Conference «ACTUAL ISSUES ON SAFETY AND ANALYSIS OF HUMAN HEALTH RISK FROM ENVIRONMENTAL HAZARDS».

The Conference is an interdisciplinary event and is dedicated to researches for improving local and national public health using the best experience and will bring together scientists and health professionals from all over Russia and international experts.

Twenty first century brings many challenges in the field of sanitary and epidemiological welfare of the population and, at the same time provides the new opportunities to overcome the threats to the security and health of citizens.

It is now widely recognized that the health of the population is influenced by the various social and environmental determinants. The aim of the health risk analysis, as a component part of preventive medicine, is the prediction and assessment of adverse changes in health status at the individual and population levels taking into account all the amount of factors.

This situation requires the creation and development of the new innovative methodologies, that meet modern requirements and address key strategic objectives to: “significantly improve the health and well being of populations and strengthen public health”.

We warmly welcome you to Russia, to the Urals, to Perm – the first city of Europe as we call it, because it is located very close to the Europe – Asia border. Often described as an industrial center, Perm is much more than that. A city of great diversity, Perm offers something for everyone – whether you have scientific interest or are you a seeker for cultural events.

You can be assured of warm hospitality, large-scale scientific program and a lot of places of interest.

Fellow of the Russian Academy of Sciences,
Professor Nina Zaitseva, DSc.
Director
Federal Scientific Center
for Medical and Preventive
Health Risk Management Technologies
